

KROMA

1920

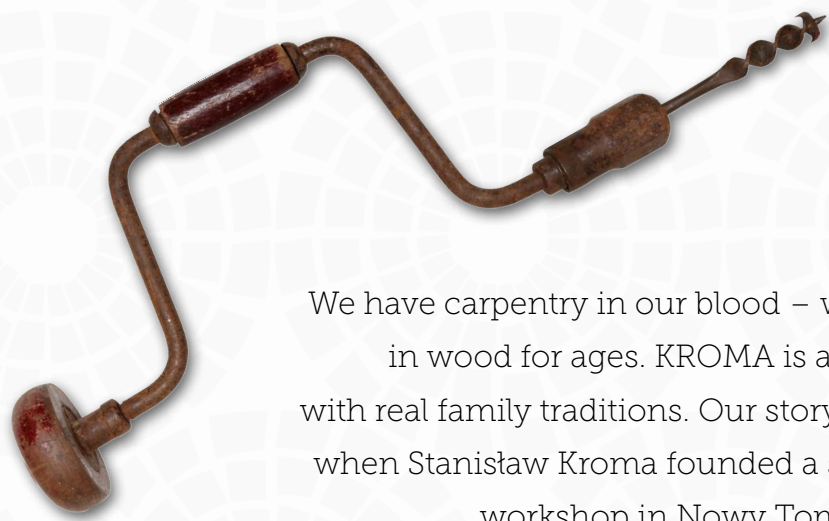

*With legacy into modernity*

**KROMA.**

We have carpentry in our blood – we have worked in wood for ages. KROMA is a company with real family traditions. Our story begins in 1920, when Stanisław Kroma founded a small carpentry workshop in Nowy Tomyśl.

We have been developing our skills for almost a hundred years. What is our recipe for success?  
**Reliability, precision and modernity.**

The constant change is a part of the family enterprise. Today KROMA is a modern company with a machine park and skills which can manage any challenge.

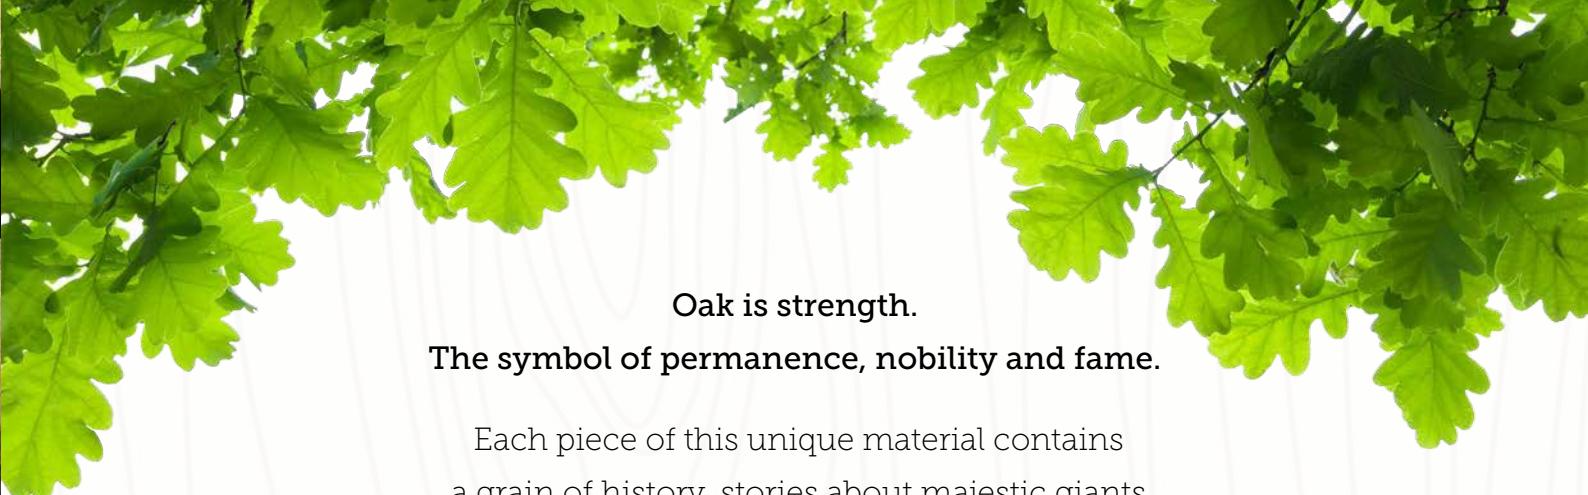

# **KROMA** *of the highest quality.*

The harder the wood from which  
a board is produced, the better is its quality.  
We make our boards from oak and beech.  
This kind of wood is known for its resistance  
and strength.

Wood from which we produce our boards comes from forests managed in a balanced manner. Our products are ecological, we care about the nature.

**Oak is strength.**  
**The symbol of permanence, nobility and fame.**

Each piece of this unique material contains a grain of history, stories about majestic giants that existed beyond time in a way. It is worth remembering that oak wood is hard, waterproof and remarkably resistant.

**Beech is elegance.**  
**The symbol of love, fertility and patience.**

Its bark is smooth, slightly shiny, and the crown is expansive. Trees of this kind, growing one next to another, create delightful beech forests. The beech wood is hard, heavy and resistant, while the boards made from beech are totally beautiful.

# How **KROMA** is created?

Every KROMA board is one of a kind.

An effect of craftsman's handwork.

Our products are easily recognizable, reflecting our attention to detail. There is no production line here – an experienced and skilled worker matters instead.

## *Do you know that...*

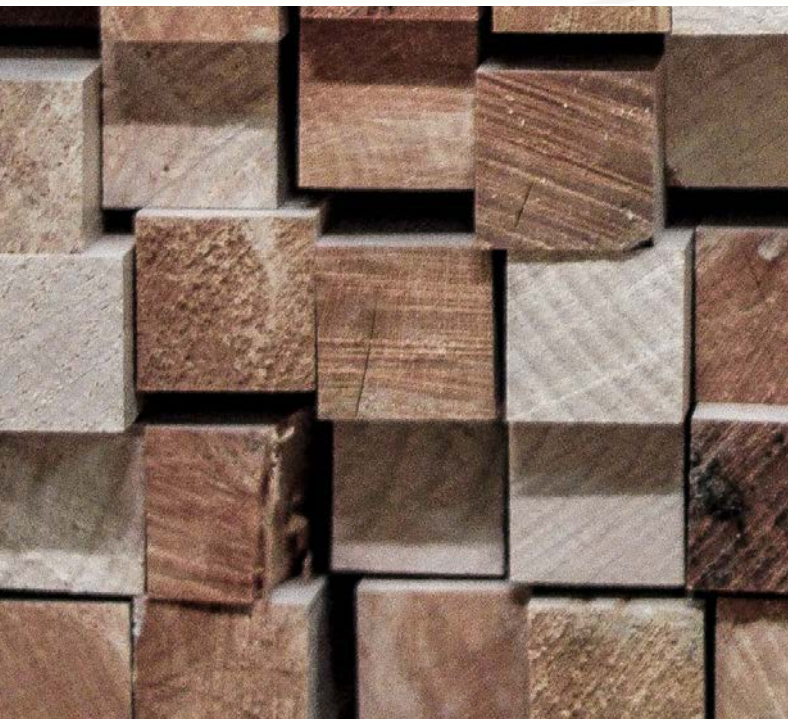

- ◆ *Wooden boards have natural, antibacterial qualities, and those made from hard wood can stop even the most dangerous bacteria.*
- ◆ *Wood has a natural ability to close up small cuts.*
- ◆ *Wooden boards do not blunt knives.*

The wood from which the KROMA boards are made is seasoned and dried to 8% moisture content.

Every board is manually assembled from several elements. The real art is to create a uniform colour, without discolouration and knots.

The smoothness of our boards make them feel even delicate. To achieve that, we polish them with the P150-grit size sandpaper.

The boards are lubricated with the highest-quality oil. This natural preservative protects wood against water in a permanent and ecological manner.

# MONKEY +

Due to the special processing, the large, professional Monkey board is unusually light and comfortable. What is worth noticing is the original 2-in-1 solution. The removable board, being a part of the large board, will facilitate your work in the kitchen and enable to serve meals fast.

mobile board

ergonomic grips

MONKEY +  
Art. no. 100-001-12

A SET:

**Length:** 61 cm  
**Width:** 39 cm  
**Thickness:** 3,4 cm  
**Weight:** 5 kg  
**Wood:** Thermobeech

MOBILE BOARD:

**Length:** 35 cm  
**Width:** 21 cm  
**Thickness:** 1,5 cm  
**Weight:** 0,85 kg
